

Welcome and thank you for taking the time to attend our exhibition today

Merrist Wood College is part of the Guildford College Group and specialises in land-based industries and sport education. The campus spans approximately 162 hectares in Worplesdon and hosts a wide range of learning and recreational resources.

Facilities at the College include an indoor equine arena, animal management centre and specially designed training studios as well as workshops for arboriculture, floristry, garden design, horticulture and landscaping. A variety of sports pitches and other facilities are also available at the campus.

In recent years, the College's facilities have fallen behind some of the top performing land-based colleges in the UK and the campus is in need of urgent investment and renewal.

The college is proposing to bring Merrist Wood into the 21st Century through a series of enhancements to the campus and its facilities. With government funding no longer available, the only way that the College can realise funds for the improvements is by selling off some of their assets and reinvesting the money back into the programme of works.

Please let us know your thoughts

By speaking to a representative, or completing a feedback form at the end.
